

CoinDebut

CoinDebut, part of TechDebut, is the most cost-effective way for cryptocurrency and blockchain companies to reach media at the very start of the Consumer Electronics Show (CES)[®] -- more than 300 reporters typically attend each TechDebut (now in its ninth year), which focuses on new products, startups, international companies, mobile, VR and blockchain/cryptocurrency companies.

Many great companies have launched at CoinDebut, including the initial launches of Ethereum (2014), Factom & Storj (2015) and pre-launch press for the Voxel (2016). Prominent TechDebut launches have included YapTV (2010), Liquipel (2012), and Quantum Leap VR cameras (2016). Reporters from ABC, AP, BBC, Bloomberg, *BusinessWeek*, *Engadget*, *Financial Times*, *Forbes*, Fox News, *Mashable*, *NY Times*, *TechCrunch*, *Wall Street Journal*, *Wired* and many more have attended and written stories about the participants.

This year, CoinDebut will take place at the Mandalay Bay Resort and Casino on Tuesday, January 3, in a series of private suites. The event will take place directly after the official CES media events, which are also in Mandalay Bay, and is the earliest independent media showcase of the conference, allowing stories to break well before the showfloor opens. The event takes place from 8-11 pm and includes food and premium wine and beer. Please choose from one of the options below that best suits your needs.
